Foreign Affairs and International Trade Canada

Going Global - Innovation

- Supports Canadian researchers from private companies, universities, or NGOs in accessing international R&D collaborative opportunities through the development of partnerships with key players in other countries/economies.
- Up to 75% of eligible project costs can be reimbursed to successful applicants at the conclusion of the project
- Eligible project costs include:
 - **Travel and related costs**
 - airfare, local transportation, accommodation, meals and incidentals
 - **Other non-research costs**
 - Meeting costs, Participation at targeted exhibitions and conferences, Cost sharing for the development of legal documentation, Translation services

International Science and Technology Partnerships Program India, China, Brazil, Israel, USA/California www.istpcanada.ca

- **India, China and Brazil:** International Science and Technology Partnerships Canada (ISTPCanada) www.istpcanada.ca
- **Israel:** Canada Israel Industrial Research and Development Foundation (CIIRDF) www.ciirdf.ca
- **California:** Canada-California Strategic Innovation Partnership (CCSIP) www.ccsip.org

These programs may:

- support up to 50% of the costs of approved joint research projects proposed by companies and universities/colleges and other private sector research and development institutes.
- conduct matchmaking activities
- contribute funding to projects conducted by companies through the Professional Development Activity (PDA) process.
